College of Engineering

Regulations for Applications and Reviews for Book and Instrument Purchase Subsidies

Amended and approved by the 2nd Academic Review Board Meeting in School Year 91.

Amended and approved by the 2nd Academic Review Board Meeting in School Year 94.

- I. Considerations of the College of Engineering in subsidies for book and instrument purchases:
 - A. Nature of project: The priority order shall be as follows: advanced laboratories (including the Joint Laboratories) and industry-academia projects → integrated projects (with the master project conducted inside the college) and Ministry of Education improvement projects → unique research projects → research projects conducted by faculty members with outstanding academic performance.
 - B. Integrability of project: The priority order shall be as follows: inter-college/university projects → inter-department/institute projects → projects of the institute.
 - C. Sharability of instrument and equipment: In principle, funding shall be provided for purchases of instruments and equipment open to public access.
 - D. Comprehensiveness of planning: Projects for long-term purposes shall be given priority.
 - E. Each unique research project shall have at least three faculty members of the college dividing the work on the same research topic.
- II. Each application for book and instrument purchase subsidies from the college shall require cooperative funds from the department or institute in concern and the approval as well as signature of the department chair or institute director shall be acquired before the application may be filed. In principle, the subsidy amount from the college shall not be more than the subsidies provided by the department or institute. Applicants receiving subsidies shall use the cooperative funds from the department or institute first and use the subsidies from the college if such funds are inadequate.
- III. Applicants who have received such subsidies from the college within the two previous years shall submit a one-to-two page performance report when applying for subsidies. Subsidies for such applicants shall not be considered until new applicants are given subsidies and there are funds remaining in the budget.
- IV. New full-time faculty members may apply for funding once within their first year in the university. Each applicant may receive up to NT\$200,000 of subsidies for instrument purchases provided that the unit to which the applicant belongs also put forth an equal

amount or more of cooperative funds.

- V. The members of the Academic Review Board may not apply for book and instrument purchase subsidies of the college for the sake of fairness.
